

**17 - 013**

## AMV Mishap Claims One Soldier's Life

A USARCENT Soldier was fatally injured as a result of an AMV mishap that occurred on 10 November 2016, at approximately 1100 local, in Camp Beuhring, KU. The 23-year old SPC was operating an M1151 up-armored HMMWV (without cupola) in a training area when it went out of control and overturned. The SPC, who is suspected as having been unrestrained, was pinned under the vehicle and passed away from his injuries at the local troop medical clinic. The SFC who was riding with him suffered injuries requiring hospitalization. This accident is still under investigation but rate of speed under road conditions is suspected as a causal factor.

This is the **2<sup>nd</sup>** Class A, AMV fatality in FY17, compared to **0** in FY16 for the same timeframe. This PLR does not identify specific root causes of this incident, as the investigation is ongoing. Further details will be available at a later date through RMIS (RMIS Login Required).

PLRs are intended to alert leaders to mishaps resulting in the loss of Soldiers/Civilians and to provide awareness in the interest of prevention and combat readiness.

Our Army depends on you to use these PLRs to help Soldiers understand the impact of decisions made on and off duty.
